

OUR TAPE HAS PULL

THE SUPERIOR PERFORMANCE OF STA ACRYLIC CARTON SEALING TAPE IS EVIDENT IN THIS SIMPLE TEST.

Gently apply a strip of STA acrylic tape to a corrugated carton. Quickly, our tape bonds to the surface. The box fibers draw in our soft, water-based acrylic adhesive, and when you pull the tape up, fibers are pulled from the carton. The same test with hot melt tape pulls little or no fiber.

The most important quality you depend on for packaging tape is adhesion to corrugated box surfaces. STA Proven Performance tapes are the industry leaders in acrylic carton sealing tape. Our tape consistently out-performs the competition in adhesion and clarity.

Select STA...and stick with it!
